Risk Profile of the Scheme	Mutual Fund Units involve Investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below: The scheme will predominantly invest in equity and equity related securities of bluechip large cap companies. Thus, any price fluctuation for these securities may adversely affect the NAV of the units issued under the Scheme. Indiabulls Bluechip Fund may generate returns which are not in line with the performance of the S&P CNX Nifty Index and may arise from a variety of factors including but not limited to:-1) The fund will deploy 0-35% of the net assets by investing in securities other than Large Cap companies in percentages as decided by the investment team from time to time. This will result in the performance of the fund being at variance with the S&P CNX Nifty Index. Also these scrips will normally carry higher risk then Large cap companies. 2) Transaction and other expenses, such as but not limited to brokerage, custody, trustee and asset management fees. 3) Being an openended scheme, the scheme may hold appropriate levels of cash or cash equivalents to meet ongoing redemptions. The same may also lead to out-performance or under-performance of the scheme against S&P CNX Nifty which is the benchmark index for the scheme. Equity and Equity Related Instruments by nature are volatile and prone to price fluctuations on a daily basis due to macro and micro economic factors. The value of Equity and Equity Related Instruments may fluctuate due to factors affecting the securities markets such as volume and volatility in the capital markets, interest rates, currency exchange rates, changes in law/policies of the Government, taxation laws, political, economic or other developments, which may have an adverse impact on individual securities, a specific sector or all sectors. Consequently, the NAV of the Units issued under the Scheme may be adversely affected. Trading volume in individual stocks may restrict
